FOR IMMEDIATE RELEASE

September 10, 2004

A-1 VACUUM & SEWING AND BABY LOCK INTRODUCES THE MOST ADVANCED HOME SEWING AND EMBROIDERY MACHINE: THE ELLEGANTE

Elegance and ingenuity that will make you fall in love with sewing, all over again.

ST. LOUIS A-1 Vacuum & Sewing, an authorized Baby Lock retailer located in Albuquerque introduces the new Baby Lock Ellegante, an advanced sewing and embroidery machine that will make you fall in love with sewing all over again. This machine offers power, speed and flexibility for all your sewing and embroidery projects.

But let's start with the looks - The first attribute you'll notice is the Ellegante's sophisticated beauty. Sleek and elegant, this machine offers clean lines and convenient positioning for sewing: perfect angle of the large LCD screen, the comfortable position of the knee lift and the four, bright sewing lights. You'll wonder how you ever sewed without these advancements. The industry leading, largest LCD screen is a color-touch screen with an easy-to-remove cover to protect function buttons during progress.

The machine's beauty is matched by its technology. With the ability to embroider 1,000 stitches per minute, auto-trimming of jump threads and an innovative auto-threader, the Ellegante makes efficient use of your time - giving you an opportunity to create and design rather than wait for the machine. In fact, the On-Request automatic needle threader can have your machine threaded and ready to go in just four seconds. Another timesaving measure is the Ellegante's ability to switch effortlessly from embroidery to

utility sewing without removing the fabric from the embroidery unit. No more shutting down the machine to stitch a quick seam.

Computer technology continues to make home sewing easier and more professional. I can assure you that Baby Lock is charting new territory with this machine, said Nancy Zieman, PBS host of Sewing With Nancy.

Your creativity has no boundaries with the Ellegante's connectivity options. With Ellegante's media selections and USB connectivity to PCs, you have ease-of-access for all embroidery ideas. Select embroidery designs from a embroidery memory card, your computer or through an external floppy drive or Flash drive. The optional Flash drive and optional floppy drive, two drives specially tested for the Ellegante, are included during an introductory time.

In addition to the ability to import designs, the Ellegante offers more embroidery designs and sewing stitches in the machine than any ever before from Baby Lock. Your design collection increases by 416 designs, 32 designs are from the studio of Nancy Zieman. These 32 designs are only available on the Baby Lock Ellegante.

The bright touch screen show you colors (4,096 different colors), design size and multiple editing features. Now you can see it on screen before you ever sew a stitch. With on-screen editing, you can resize, reposition and preview designs using the Embroidery Edit mode.

Hoop sizes on the Ellegante range from 7 X 11 3/4 to 3/4 X 2 3/8 with four different hoops. The Ellegante also allows you to create continuous borders flawlessly with its continuous hoop feature built-in. Any design from the built-in library or the sewing enthusiast's library can become a continuous design. In addition, there is generous workspace to the right of the needle, for any sized project. Another ease-of-use design feature is the detachable foot control with a handy retractable cord.

With so many innovative features and a beautiful package, the new Baby Lock Ellegante sewing and embroidery machine will allow you to create, design and enhance your love of sewing.

Try out the new Ellegante at A-1 Vacuum & Sewing or call 323-4200 for more information. New Mexico's largest thread selection. Trusted for more than 61 years. You'll fall in love with sewing, all over again.

Baby Lock a major underwriter of the popular PBS television show Sewing With Nancy starring national sewing authority Nancy Zieman offers a full line of products that enhances the love of sewing, including technically advanced sewing machines, sergers, embroidery products and exclusive software.
